

Installation Instructions for 35, 70, & 75 series GlideRite drawer slides

GlideRite
HARDWARE

NOTE: Drawer needs 1/2" clearance on both sides to accommodate slides

See our complete line of drawer slides at: www.gliderite.com

Before installing the slides, separate the cabinet and drawer members. There is no difference between the left and right slide, the release lever moves upward on the left hand side and downward on the right hand side.

Drawer must be 1/2" narrower than cabinet opening on each side. Top and bottom drawer should have 1/8" minimum clearance from the cabinet opening.

Install Cabinet Members First:

1. Using a level, place and align cabinet member into position. For **Overlay Drawer Fronts**, align the front of the cabinet member with the front edge of the cabinet. For **Inset Drawer Fronts**, setback the front of the cabinet member the thickness of the drawer front.
2. Fasten each side with two pan-head wood screws into the horizontal slots.

Install Drawer Member:

1. Align the front edge of the drawer member with the front edge of the drawer box.
2. Fasten each member with two #8 x 7/16" or #8 x 1/2" pan-head screws in the vertical slots.

Inserting Drawer:

1. Push intermediate member all the way back and pull the ball bearing retainer all the way forward to the front of the cabinet. Insert drawer member into ball bearing retainer channel and close. The drawer release lever will lock as drawer is closed.
2. If necessary, **adjust the height** of the drawer using the vertical slots on the drawer member; and the **depth of the drawer** by adjusting the horizontal slots on the cabinet member.
3. When all adjustments are complete, install an additional screw in the center hole on the cabinet and drawer member to lock the slide members in position. At least two locking screws per member are recommended for supporting heavy objects and to avoid tear-out of slide.

NOTE: Face-frame cabinets require rear face-frame brackets. Use SK-70 brackets for our 45mm slides and SK-35 brackets for our 35mm slides. Both are available at www.gliderite.com if you require additional help, please e-mail us at: help@gliderite.com
